This startup script uses the
EAP_HOME

/bin/standalone.conf file, or
standalone.conf.bat for
Windows Server, to set
some default preferences,
such as JVM options. You
can customize the settings
in this file. JBoss EAP uses
the standalone.xml
configuration file by
default, but can be started
using a different one. For
details on the available
standalone configuration
files and how to use them ...

Configuration Guide - Red
Hat Customer Portal - The
configuration file is
executed as Python code at
build time (using `execfile()`),
and with the current
directory set to its
containing directory), and
therefore can execute
arbitrarily complex
code. Sphinx then reads
simple names from the
file's namespace as its
configuration.

Configuration " Sphinx
